

DENISCO CHEMICALS — COMPANY WORKFLOW (DEPARTMENT-WISE)

1. Enquiry & Sales Order (Marketing / Sales Department)

Purpose: Convert customer enquiries into confirmed sales orders.

Workflow:

1. Receive customer enquiry (email / phone / website).
2. Prepare **Quotation / Proforma Invoice**.
3. Get management approval for price and delivery terms.
4. Send quotation to customer.
5. On acceptance, receive **Customer Purchase Order (PO)**.
6. Create **Sales Order** in Focus X ERP.
7. Forward approved Sales Order to Planning & Production for scheduling.

Documents:

- Customer Enquiry / Email
- Quotation / Proforma Invoice
- Customer PO
- ✓ • Sales Order (ERP)

2. Production Planning (PPC Department)

Purpose: Plan production based on sales demand and stock availability.

Workflow:

1. Review Sales Order and product delivery schedule.
2. Check availability of Raw Materials, Packing Materials, and Lab Chemicals.
3. If shortage detected → raise **Purchase Requisition (PR)** to Purchase Department.
4. Prepare **Production Plan / Schedule**.
5. Generate **Production Order / Batch Number** in ERP.
6. Share plan with Warehouse and QC.

Documents:

- Sales Order Copy
- Production Schedule
- ✓ • Purchase Requisition (PR)
- ✓ • Bill of Materials (BOM)
- ✓ • Production Order

Bill of Materials

BOM process

RM. Requisition.

production orders

3. Procurement & Material Inward (Purchase + Stores Department)

Purpose: Procure required materials as per production and lab needs.

◆ **A. Purchases with PO (controlled items)**

→ For **Raw Materials, Lab Items, and Packing Materials**

Workflow:

1. Receive Purchase Requisition from Production / QC / R&D.
2. Float enquiries to approved vendors.
3. Collect and compare quotations.
4. Prepare **Purchase Order (PO)** in Focus X ERP.
5. Get PO approval as per authority matrix.
6. Send approved PO to supplier.
7. Supplier delivers materials with **Invoice + Delivery Challan**.
8. Store receives material, checks quantity and condition → prepare **MRN (Goods Receipt Note)**.
9. Send sample to QC for testing.
10. QC approves → Material accepted into stock.
11. QC rejects → Material returned with **Rejection Note / Debit Note**.

◆ **B. Purchases without PO (General Purchases)**

→ For **Office supplies, Maintenance, Repairs, Tools, Stationery, Housekeeping, etc.**

Workflow:

1. Department raises **General Purchase Request (GPR)** or **Indent**.
2. Purchase Department sources vendor and finalizes price.
3. Get approval from authorized person (as per limits).
4. Place **Direct Purchase Order (optional)** or proceed with **Direct Purchase Entry**.
5. Receive material and verify quantity.
6. Record **Goods Inward Entry** in ERP (no PO link).
7. Forward vendor invoice to Accounts for payment approval.

Documents:

- ✓ Purchase Requisition / Indent
- Vendor Quotation
- ✓ Approved Purchase Order (if applicable)
- Delivery Challan
- ✓ MRN / Goods Inward Entry
- ✓ QC Report (for RM/Lab/Packing)
- ✓ Material Rejection / Return Note

4. Production Execution (Manufacturing Department)

Purpose: Manufacture products as per production orders and maintain batch traceability.

Workflow:

1. Receive **Production Order** from PPC.
- ✓ 2. Request raw materials from Warehouse (Material Issue Slip).
- ✗ 3. Execute process (Reaction, Filtration, Drying, Packing).
- ✗ 4. Record details in **Batch Manufacturing Record (BMR)**.
5. Send **In-Process Samples** to QC. *RM*
6. After QC approval → Label batch as "Approved".
7. Transfer finished goods to FG Store.

Documents:

- ✓ Material Issue Slip
- ✓ Batch Manufacturing Record (BMR)
- ✓ In-Process QC Report *Inspection*
- ✓ Finished Goods Transfer Note *QC Inspection*

5. Quality Control (QC Department)

Purpose: Ensure all materials and finished goods meet required quality specifications.

Workflow:

1. Receive *samples of* Raw Material, In-Process, and Finished Goods.
2. Conduct testing as per specification sheet.
3. Record results and observations in **QC Test Report**.
4. Generate **Certificate of Analysis (COA)**.
5. Update ERP with QC approval status.
6. If failed, inform QA & Production for corrective action.

Documents:

- Sample Register *(Registration)*
- QC Test Report
- COA (Certificate of Analysis)
- ✓ QC Approval / Rejection Report

6. Quality Assurance (QA Department)

Purpose: Ensure overall compliance, documentation, and audit preparedness.

Workflow:

1. Review QC, Production, and Dispatch documents.
2. Approve Batch Production Record (BPR).
3. Release batch for sale after QA clearance.
4. Handle deviations, OOS, and CAPA.
5. Ensure all documents follow SOPs.
6. Conduct internal quality audits.

Documents:

- BPR / BMR
 - Deviation Report
 - OOS (Out of Specification) Report
 - CAPA Report
 - Internal Audit Report
-

7. Dispatch / Logistics

Purpose: Dispatch finished goods to customer safely and legally.

Workflow:

1. Receive dispatch instruction after QA release.
2. Prepare **Packing List, Delivery Challan, Invoice, and E-Way Bill.**
3. Arrange transporter and load material.
4. Update ERP and stock ledger.
5. Share dispatch details and invoice to customer.

Documents:

- Packing List
 - Delivery Challan
 - Tax Invoice
 - E-Way Bill
 - Lorry Receipt (LR) / Transport Copy
 - Dispatch Register
-

8. Accounts & Finance

Purpose: Manage all financial transactions, taxation, and reporting.

Workflow:

1. Record supplier invoices against MRN (for PO-based purchases).
2. Record direct invoices (for general purchases without PO).
3. Validate GST numbers and tax structures.
4. Record customer invoices and receipts.
5. Handle vendor payments and bank reconciliations.
6. File statutory returns (GST, TDS, PF, etc.).
7. Monthly closing and trial balance.
8. Prepare MIS & Financial Statements.

Documents:

- ✓ Purchase Invoice / Sales Invoice
- ✓ Payment Voucher / Receipt Voucher
- Bank Statement
- ✓ GST Returns (GSTR-1, GSTR-3B)
- ✓ Trial Balance / P&L / Balance Sheet

9. Research & Development (R&D)

Purpose: Develop new molecules, improve products, and support production scale-up.

Workflow:

1. Define new project / product concept.
2. Conduct lab-scale trials and record in Lab Notebook (LNB).
3. Analyze results and prepare report.
4. Submit findings to QA / Management.
5. If approved, transfer process to Production for pilot or commercial scale.

Documents:

- R&D Proposal / Project Sheet
- Lab Notebook (LNB)
- Analytical Data Sheet
- Process Development Report
- Technology Transfer Document

10. Human Resources (HR & Admin)

Purpose: Manage workforce, payroll, and statutory compliance.

Workflow:

1. Maintain employee master in ERP.
2. Record attendance (biometric/manual).
3. Process leave and overtime requests.
4. Prepare and process monthly payroll.
5. Manage statutory deductions (PF, ESI, TDS, PT).
6. Handle recruitment, training, and appraisals.

Documents:

- Employee Master Data
- Attendance Register
- Leave & OT Sheets
- Salary Register / Payslips
- Compliance Reports (PF, ESI, PT, etc.)

11. Maintenance & Engineering

Purpose: Maintain plant, utilities, and ensure equipment reliability.

Workflow:

1. Receive maintenance request / breakdown report.
2. Schedule preventive maintenance.
3. Record service details, spare usage, and downtime.
4. Raise **General Purchase Request** for spares (without PO).
5. Coordinate with Stores and Accounts for spares issue & cost booking.

Documents:

- Maintenance Logbook
- Breakdown Report
- Preventive Maintenance Schedule
- Spare Parts Issue Slip
- General Purchase Record

12. EHS & Compliance (Environment, Health & Safety)

Purpose: Ensure regulatory and environmental compliance.

Workflow:

1. Monitor waste disposal, emissions, and effluent treatment.
2. Maintain MSDS for all chemicals.
3. Conduct safety training and incident tracking.
4. Prepare compliance reports for PCB / Factory Inspector / Fire Dept.
5. Coordinate for renewals and audits.

Documents:

- MSDS / SDS Sheets
- Waste Disposal Log
- Compliance Certificates
- Audit Reports
- Incident Register

13. Management & MIS

Purpose: Review performance and enable decision-making.

Workflow:

1. Consolidate data from Sales, Production, QC, Accounts, and HR.
2. Prepare monthly MIS reports.
3. Analyze performance, variance, and profitability.
4. Set next month's production and sales targets.
5. Conduct management review meetings.

Documents:

- MIS Reports (Sales, Production, Finance, QC)
- Monthly Performance Summary
- Management Review Minutes

OVERALL FLOW SUMMARY

Customer Enquiry → Quotation → Customer PO → Sales Order → Production Plan → Purchase → MRN → QC → Production → QA → Dispatch → Invoice → Accounts → MIS

With PO: Raw Material, Lab Items, Packing Material

Without PO: General Purchases (Maintenance, Office, Utilities, etc.)
